***Claim Rejections - 35 USC § 112***

Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, lines 2 & 5, recites "a barrel shape pot having a flat, elongate horizontal cross section" and "an axis line of the pot," which are indefinite because neither the shape nor orientation of the pot has been established so as to define the meaning of a "horizontal cross section" or "an axis." Moreover, "flat" (also in line 5) is a relative term lacking context in the claim to establish a clear meaning.

Also, in lines 4-6 of claim 1, "a steam suction portion" lacks any structure which would endow meaning to the limitation "that extends... in a direction [such that it] crosses an axis line of the pot." Further, that the "steam suction portion" "occupies a space having a flat vertical cross-sectional shape" is also indefinite since the claim is completely lacking in structural/geometrical context which would identify the meaning of "crosses," "space," and vertical," at least.

***Allowable Subject Matter***

Claims 1-9 **would appear to be** allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
